Indiana Crop Weather

October 11, 2016

Dry Winds, Warm Days

Dry fall weather aided farmers in **corn** and **soybean** harvest, according to Greg Matli, Indiana State Statistician for the USDA’s National Agricultural Statistics Service. The statewide average temperature was 64.4 degrees, 7.8 degrees above normal. Many fields remained too damp to harvest at the beginning of the week; however, the dry and breezy weather kept farmers out in the fields as conditions continued to improve. Statewide precipitation was near zero at 0.08 inches, below average by 0.77 inches. There were 6.0 days available for fieldwork for the week ending October 9, up 2.1 days from the previous week.

Some farmers are waiting to plant winter **wheat** until the damp soils dry out from the previous week’s rains. Few farmers got the last of their **hay** cut and baled this week. Livestock was reported to be in good condition, and some remain on pasture much later than normal. Other activities for the week included harvesting tomatoes, planting cover crops, drying **corn**, hauling grain, tilling fields, and mowing roadsides.

Soil Moisture: Week Ending 10/09/16

Item	Very short	Short	Adequate	Surplus
	(percent)	(percent)	(percent)	(percent)
Topsoil moisture	1	12	78	9
Subsoil moisture	1	11	81	7

Crop Condition: Week Ending 10/09/16

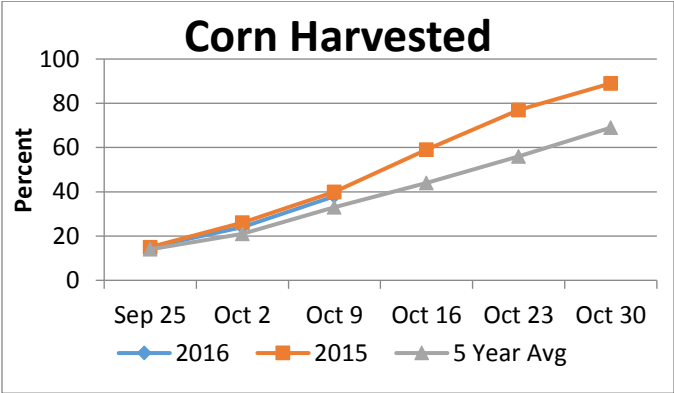

Crop	Very poor	Poor	Fair	Good	Excellent
	(percent)	(percent)	(percent)	(percent)	(percent)
Corn	3	6	19	55	17
Soybeans	1	5	16	56	22
Range and Pasture....	3	7	28	54	8

Crop Moisture Content: Week Ending 10/09/16

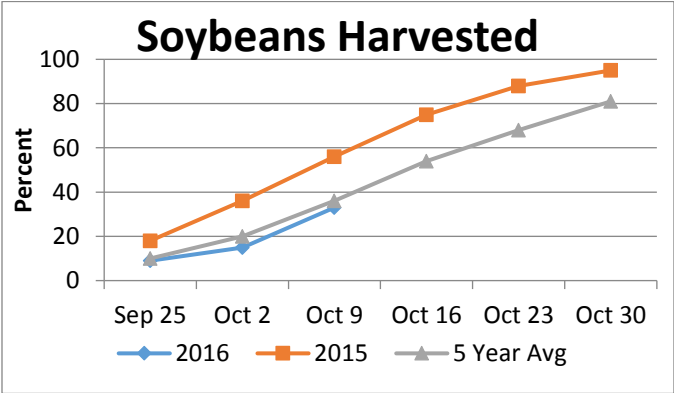

Crop	This week	Last week	Last year	5-year average
	Percent	Percent	Percent	Percent
Field corn harvested for grain	20	20	18	NA
Soybeans harvested	14	14	12	NA

Crop Progress: Week Ending 10/09/16

Crop/Activity	Percent Completed			
	This week	Last week	Last year	5 Year average
Days Suitable for Fieldwork	6.0	3.9	NA	NA
Corn Mature	94	87	89	86
Corn Harvested for Grain	38	24	40	33
Corn Harvested for Silage	96	93	NA	NA
Soybeans Dropping Leaves	91	82	94	91
Soybeans Harvested	33	15	56	36
Winter Wheat Planted	28	12	40	30
Winter Wheat Emerged	9	3	15	9
Alfalfa Hay 4th Cutting	80	72	66	NA
Other Hay 3rd Cutting	86	82	95	NA
Tobacco Harvested	83	79	94	NA

Corn matured was 87% complete in the North, 94% in Central and 94% in the South. **Corn** harvested for grain was 29% complete in the North, 35% in Central, and 63% in the South. **Corn** harvest has nearly caught up to last year and is now ahead of the five-year average. While the dry week was beneficial for harvest progress, it had little impact on the disease and mold presence that remains in the fields. Stalk strength continues to be a concern during harvest, but the overall condition of the crop remains stable. **Corn** rated in good to excellent condition was 73% in the North, 75% in Central, and 60% in the South.

Soybeans dropping leaves were 95% complete in the North, 92% in Central, and 83% in the South. **Soybeans** were 35% harvested in the North, 37% in Central, and 22% in the South. **Soybean** harvest is well underway at this point, with the moderate fall weather helping to dry down the fields. With the exception of the tornado-swept areas, most of the **soybeans** are in good condition and are being harvested quickly while the weather remains favorable. **Soybeans** rated in good to excellent condition was 80% in the North, 82% in Central, and 66% in the South.
